VIRTUAL TRAINING

Person-Centered Contraceptive Care

Lesson 1: Recognizing and Diminishing Bias to Achieve Equity and Reproductive Autonomy

Outcome

Demonstrate an increase in self-awareness of existing implicit biases.

Objectives

- Describe 2 historical events that demonstrate the use of reproductive coercion
- Identify key approaches to mitigating bias and inequity to help patients achieve the highest level of health

Lesson 2: Providing Person Centered Contraceptive Counseling

Outcome

Participants utilize shared decision-making methods when providing contraceptive counseling.

Objectives

- Describe person-centered contraceptive counseling and the three principles of person-centeredness, reproductive autonomy, and health equity
- Describe the PATH Framework and how to use it to provide contraceptive counseling

Lesson 3: Overview of Contraceptive Methods and their Features

Outcome

Participants demonstrate knowledge of the full range of birth control options.

Objectives

- Explain the different method characteristics that influence contraceptive decision-making
- Describe the challenges of only using a tiered effectiveness model of counseling
